### CustomInk.com

This vendor has a user friendly design lab that offers a wide print range, resulting in a better visual print. They provide satisfactory service along with competitive pricing, their prices also include shipping.

You will need to upload the T-Shirt Image Files provided on the ezCash4Life.com promotions page when designing your T-shirt. You can use the models on the promotions page as a guideline for your project (ezcash4life.com/promotions.html).

**Note:** The CustomInk design lab T-shirt is smaller than an actual T-shirt. Therefore, the design you create will appear larger than actual size. To further understand, place a tape measure across your favorite fitting T-shirt to visualize the actual size and placement of your images (e.g., a large T-shirt is approximately 22" wide when laid flat, based on the specifications below the width of your images will range from 9 to 14 inches, leaving an equal difference on each side of your images).

Below are directions for designing your custom T-shirt at CustomInk.com (As of July 1, 2017). The suggested specifications create a nice proportional print on a t-shirt, and will provide a good baseline for any future projects.
